

## ACTIVITY REPORT

Economics is a subject that mostly depends on theories and their assumptions. It becomes a bit difficult for the students of economics to understand these theories. Therefore, the faculty of the department put in efforts to create the methods and ideas by which students can understand practically. To reinforce those methods and ideas, in the academic year 2023-24, the department has organized activities such as role play and quiz competitions. The main theme of role-play was to make students understand economics, particularly the Indian economy. In this activity, students participated actively and played the role of various economic agents like traders, investors, banks, consumers, producers, etc. In this activity, students got to know how the economy of a country functions and how is it associated with the world economy. This activity helped the students to understand economics practically. In the quiz competition, students of all classes took part, and questions were asked from micro and macro-economics. Thus, all the activities organized from time to time by the department are very helpful in developing the cognitive power of students. The photographs of some activities are also displayed here.
